REVE Systems Receives a 2011 Unified Communications Excellence Award

Dec 28, 2011

Singapore

REVE Systems announced today that [TMC](#), a global, integrated marketing company, has named *iTel Switch Plus* as a recipient of its 2011 *Unified Communications Excellence Award*.

iTel Switch Plus is a carrier grade softswitch that comes with integrated billing solution and Interactive Voice response (IVR) system. With iTel Switch Plus 2.0, the customers get the comfort to operate all call origination devices with single PIN, so one can use same PIN for mobile top-up, PIN recharge and even for voice calls.

On being accredited with the award from TMC, REVE System's CEO, Mr. Rezaul Hassan said, "It's an honour to receive the Unified Communication Excellence Award for our product iTel Switch Plus. The product has been awarded for outstanding innovation which is a matter of pride for all of us."

"With proven excellence in providing solutions in the UC marketplace, we are pleased to grant a 2011 *Unified Communications Excellence Award* to REVE Systems for iTel Switch Plus," said [Rich Tehrani](#), CEO, TMC. "Congratulations to the entire team at REVE Systems for their commitment to advancing UC technologies and we look forward to future innovations."

REVE Systems to showcase Mobile Top-Up at Gitex Technology Week, Dubai

Oct 03, 2011
Singapore

REVE Systems, a leading VoIP software solution provider has announced its participation in the upcoming Gitex Technology Week that will be held during 9th to 13th October in Dubai.

Announcing the participation, Mr. M. Rezaul Hassan, CEO said that, *“REVE Systems is all set to showcase its complete range of IP Telephony platform in the Gitex Technology Week. GITEX is one of the premier IT events in Middle East and REVE Systems will be participating for the seventh time in a row in this event. We are looking to showcase our software products to various ITSP’s/Carriers based in Middle East, Africa, CIS and Indian sub-continent.”*

He also added that, *“During GITEX Technology Week, REVE Systems will be promoting the new upgraded version of iTel Switch Plus 2.0, which offers the facility of Mobile Top-Up. With this facility, service providers can offer their end-users the ability to perform cross-border mobile recharges for their loved ones who are living in any another country.”*

Apart from Mobile Top-Up feature of its iTel Switch Plus 2.0, REVE Systems will be showcasing a complete range of IP Telephony platform for service providers ranging from start-ups to the large ones. REVE Systems’ range of IP Telephony platform includes iTel Mobile Dialer Express, iTel Mobile Call Back Dialer, iTel PC Dialer, iTel Pin Protector, iTel Switch Plus & Billing and iTel AMR Codec Converter.

REVE Systems is a leading VoIP software solutions provider which is headquartered in Singapore and has offices in Bangladesh, India and UK. The company deals with Mobile VoIP platform, Softswitch & Billing solution and other related software applications.

REVE Systems launches iTel Mobile Dialer Express™ iPhone version for end users

Sep 13, 2011

Singapore

Leading VoIP solution provider REVE Systems™ flagship product iTel Mobile Dialer Express can now be downloaded from Apple™'s iTunes store, by end users who want to make VoIP calls from their iPhones, iPad or iPod Touch.

This announcement was made by REVE™'s CEO, Mr. M Rezaul Hassan earlier this week in Singapore.

iTel Mobile Dialer Express is a mobile client used for making VoIP calls.

Announcing the availability of iTel Mobile Dialer Express on Apple™'s iTunes store, Mr. Hassan said, *"Now VoIP users can easily download REVE Systems' iTel Mobile Dialer Express from iTunes store. The dialer is compatible with iPhone 2G, 3G, 3GS & 4G, iPod Touch and iPad."*

He also added that, *"iTel Mobile Dialer Express is easy to configure and users can configure it with their account details with any VoIP service provider or IP PBX/ Softswitch. This way dialer serves the needs of end-users as well as small-to-medium companies who all use it as a medium to communicate over internet."*

Priced at an affordable 5.99 USD for the end users, the application is available in the iTunes store for download. Once downloaded, end users can configure it easily with the details of their IP PBX or their own service provider™'s softswitch, even if their service provider does not give them Mobile VoIP options. iPhone or iPad users need to download this application and connect to internet using 3G or Wi-Fi to make cheaper long distance calls and can also save on high roaming costs when they are travelling.

iTel Mobile Dialer Express is acknowledged worldwide for its unmatched features. The dialer has been awarded as the „PRODUCT OF THE YEAR“ for the year 2009 by Internet Telephony Magazine and also been accredited with the “EXCELLENCE AWARD 2010” by TMC.

REVE Systems is a VoIP solution provider offering a complete suite of Mobile VoIP platform, softswitch-billing and other software applications. The company currently serves 1250 service providers across 65 nations.

Headquartered in Singapore, REVE Systems has offices in Bangladesh, India and UK.

REVE Systems Ties up with TransferTo to Launch Cross-Border Mobile Top-Up Facility for VoIP Users

August 16, 2011
Singapore

Leading VoIP solution provider REVE Systems has signed an agreement with leading international mobile top-up service provider „**TransferTo**“, to facilitate its customer base with cross border mobile top-up utility. According to this agreement, **REVE Systems** will integrate **TransferTo**'s international airtime transfer service in their IP telephony platform „**iTel Switch Plus**“ to serve the VoIP service providers across the globe.

The announcement was made jointly today, by **REVE Systems**' CEO **Mr. M Rezaul Hassan** and **Eric Barbier**, CEO & MD of **TransferTo**.

Thanks to this partnership, VoIP service providers, who use **REVE Systems**' VoIP platform, will now be able to get an access to the **TransferTo**'s Global Airtime Remittance Hub and offer its mobile top-up service to the. This agreement will facilitate the mobile VoIP users with international mobile-top-up utility.

Announcing the agreement, Mr. Hassan said, *“REVE Systems has integrated TransferTo to its softswitch platform and hence the international mobile top-up facility will now be available to more than 1250 carriers around the world, who use REVE's platform for servicing their retail customers. What is unique in our system is that now both VoIP calls and mobile Top-Up facility can be used from the same PIN, making it very easy for the end users. With this, VoIP service providers can now offer m-commerce solutions based on our platform”*.

Commenting on the Partnership, Eric Barbier said *“with this partnership, REVE Systems will now be able to offer cross border airtime transfer services, the ideal low cost high value complement to money remittances, to its customer base across the globe. Thanks to TransferTo's reach spanning over 185 receiving mobile operators in 70 countries”*.

M. Rezaul Hassan said, *“In order to serve our customers better; we always look forward to add value to our offerings. International Mobile top-up on iTel Switch Plus is an endeavour to execute the same.”*

“We expect that international mobile top-up, aimed at the large pre-paid customer base around the world will generate additional revenue for the VoIP service providers and give mobile top-up gifting option to the millions of immigrant population who currently use VoIP services” stated Mr. Hassan.

International Mobile top-up is a feature on iTel Switch Plus, which is a carrier grade softswitch with integrated billing system. The iTel Switch Plus is available in licensed and hosted packages. For more information on the product, please visit www.itelbilling.com

REVE Systems' iTel Byte Saver Receives TMC's Communications Solutions Product of the Year Award 2010

iTel Byte Saver Recognized for Outstanding Innovation

July 18, 2011

Singapore

REVE Systems announced today that TMC, a global, integrated media company, has named **iTel Byte Saver** as a recipient of a 2010 Communications Solutions Product of the Year Award.

iTel Byte Saver is a server side software application that works in between the mobile client and service provider's softswitch. It allows VoIP calls to pass through any internet firewall or blockage by using its dynamic tunneling technology. iTel Byte Saver also helps in saving up to 50 percent bandwidth at the origination end.

Upon receiving TMC's award, REVE's CEO M. Rezaul Hassan said, *"REVE Systems is happy to have been acknowledged with 2010 Communications Solutions Product of the Year Award for iTel Byte Saver which is used by a lot of service providers because of its tunneling technology and bandwidth-saving feature. Our company always strives hard to come up with new innovations that make our products different from all available in the market."*

"REVE Systems was chosen to receive a 2010 Product of the Year Award for creating exceptional advancements in VoIP communications," said Rich Tehrani, CEO, TMC.

"iTel Byte Saver has shown benefits for its customers and provides ROI for the companies that use it. Congratulations to the entire team at REVE Systems. I look forward to more innovative solutions from them in the coming year," Tehrani added.

The Communications Solutions Product of the Year Award recognizes the vision, leadership, and thoroughness that are characteristics of the prestigious award. The most innovative products and services brought to the market from March 2009 through March 2010 were chosen as winners of the Communications Solutions Product of the Year Award.

The 2010 Communications Solutions Product of the Year Award winners are published on the *INTERNET TELEPHONY* and *Customer Interaction Solutions* Websites.

Netherlands" FastVoIP adopts REVE Systems" Mobile VoIP Platform

- *Netherlands' FastVoIP has adopted REVE Systems' Mobile VoIP platform for its mobile VoIP offerings.*
- *Fast VoIP is a very popular VoIP service provider in Netherlands*

April 19, 2011

Malaysia

Netherlands based VoIP provider FastVoIP has chosen REVE Systems" award winning iTel Mobile Dialer Express as its Mobile VoIP platform, company officials announced via a release. Fast VoIP offers the complete range of long distance calling services to its customers worldwide and now they have added the Mobile VoIP platform, so as to enable their customers to make calls from their mobile phones, using 3G/ GPRS/ Wi-Fi.

Marketing head of FastVoIP announcing the acquaintance said *"FastVoIP chose REVE Systems' Mobile VoIP Platform because of their proven product and leadership in this category. iTel Mobile Dialer Express is a very light client, which will help in quick download and supports largest range of low-end Symbian handsets and also the hi-end smartphones, is an added advantage for us".*

According to company officials, FastVoIP aims to focus on the low price market, coupled with "high service," as the way to continue company"s growth in coming years. *"Despite the fact that FastVoIP uses Tier 1 carriers to terminate its traffic and gives best quality communication through its branded offering, the company remains the most cost effective long distance service provider in Netherlands and Europe"* said FastVoIP"s marketing head. He added that their high usage customers are expatriate population in Europe, primarily comprising of the Asian & African community.

iTel Mobile Dialer Express has been awarded with **"INTERNET TELEPHONY MAGAZINE's Excellence Award'2010"** by **Technology Marketing Company, USA** for proving its dedication and excellence in advancing IP communications . Based on REVE Systems" proprietary technology, when coupled with iTel Byte Saver (which is company"s bandwidth saver tunneling product), it allows end users to bypass any internet firewall. This easy to configure application has a user-friendly interface and uses g729 codec which makes it ideal for low bandwidth networks.

Commenting on the relationship, REVE Systems CEO M. Rezaul Hassan said *"We are happy to have a reputed service provider like FastVoIP as our customer. We believe that our Mobile VoIP platform will allow them to add new customers and grow their minutes of usage, as all consumers want to have the facility of making cheaper calls from their mobile phones."*
